DETAILED ACTION

1. Applicant is advised that the Notice of Allowance mailed May 31, 2005 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 73-99 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-98 of U.S. Patent No. 6,727,696. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to omit certain elements of the patented claims to arrive at the claims at issue. For example, it would have been obvious to omit (b) and (c) in patented claim 1 making patented claim 25 identical to

Art Unit: 2859

claim 73 at issue. Note as a further example that the only difference between patented claim 35 and pending claim 88 is that one is that the first is an apparatus claim and the former a method claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 73 is rejected under 35 U.S.C. 102(b) as being anticipated by Leggett III et al. P.N. 6,088,294 (Leggett).

Leggett discloses a borehole measurement-while-drilling apparatus. The apparatus uses a control system 400 that includes an expert system for generating instructions for steering the drilling apparatus. See col. 15, lines 8-10. To be able to control the operation of the apparatus, the expert system would have to first determine from sensors the litho logy of the formation. See for example line 19 of col.12.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tubel and O'Neill et al. disclose borehole systems that use expert systems. Note the abstract of each disclosure.
